

Redline Unveils New 4.9GHz Broadband Wireless Public Safety Products

New 4.9 GHz RedCONNEX™ and RedACCESS™ products deliver reliable, high-performance solution for public safety applications

Toronto, ON, February 20, 2008 -- Redline Communications Group Inc. (TSX and AIM: RDL), a leading provider of standards-based fixed and mobile WiMAX access and broadband wireless infrastructure products, today unveiled its new RedCONNEX™ and RedACCESS™ products for the 4.9GHz band. Redline's 4.9GHz AN-80i is designed for use in public safety and military communications networks in the United States as well as in international markets where the spectrum is available for deployment of broadband wireless systems.

The 4.9GHz AN-80i is available under Redline's RedCONNEX™ point-to-point and RedACCESS™ point-to-multipoint families, enabling organizations greater flexibility and cost-effective options for establishing broadband wireless networks. The 4.9GHz products meet the strict government criteria for information assurance, supporting a number of features that ensures secure transmission, management and authentication. The 4.9GHz AN-80i provides the industry-leading long-range connections that operators have come to expect from Redline's BWI products and are software upgradeable to deliver between 9 and 90 Mbps of net throughput, allowing operators the commercial flexibility to pay as they grow.

"The launch of the 4.9GHz AN-80i products follows the introduction of Redline's new Broadband Wireless Infrastructure business unit, which is focused on the global marketing and accelerated development of our RedCONNEX and RedACCESS product families," said Kevin Suitor, Vice President, Marketing and Business Development, Redline Communications Group Inc. "Redline's backhaul and access products have been the solution of choice for operators in a variety of industry sectors. With our new 4.9 GHz products, Redline is positioned to be the leading choice for broadband wireless products for public safety applications."

"Redline has been recognized as a leader delivering the highest quality high-speed, secure, scalable and flexible broadband wireless products," said Peter Jarich, Principal Analyst, Current Analysis. "With the introduction of Redline's products for the 4.9 GHz spectrum, public safety organizations will have greater broadband wireless capacity and performance to support their fixed and mobile data, voice and video communication needs."

Redline's Broadband Wireless Infrastructure Solutions

RedACCESS™

Redline's newly-branded RedACCESS family of broadband wireless infrastructure products have been deployed by companies worldwide to support a range of applications including mobile backhaul, video surveillance, storage and business continuity, premium internet access,

and other voice, video and data services. The RedACCESS product family includes the AN-50e high speed wireless point to multipoint (PMP) Ethernet bridge, and the point-to-multipoint AN-80i broadband wireless backhaul solution. Currently operating in the 5.4 GHz and 5.8 GHz spectrum bands, the RedACCESS family leverages Redline's proven OFDM technology to deliver industry-leading, high-speed Ethernet throughput and flexible software defined configurations.

RedCONNEX™

Redline's RedCONNEX family of broadband wireless infrastructure products have been deployed by companies worldwide to support a range of applications including mobile backhaul, video surveillance, storage and business continuity, premium Internet access, and other voice, video and data services. The RedCONNEX product family includes the AN-50e high speed wireless point-to-point (PTP) Ethernet bridge, the AN-30e carrier-grade TDM backhaul solution for mobility and enterprise network operators, and the new AN-80i broadband wireless backhaul solution. Currently operating in the 5.4 GHz and 5.8 GHz spectrum bands, the AN-80i leverages Redline's proven OFDM technology to deliver industry-leading, high-speed Ethernet throughput up to 90Mbps and flexible software defined configurations. With its exceptional long range capabilities, the AN-80i is able to establish and maintain reliable and highly secure connectivity that can exceed 80 km (50 miles) in clear line-of-sight conditions.

About Redline Communications

Redline Communications (www.redlinecommunications.com) is the leading provider of standards-based wireless broadband solutions. Redline's RedMAX™ WiMAX Forum Certified™ systems and award-winning RedCONNEX™ family of broadband wireless infrastructure products enable service providers and other network operators to cost-effectively deliver high-bandwidth services including voice, video and data communications. Redline is committed to maintaining its wireless industry leadership with the continued development of WiMAX and other advanced wireless broadband products. With more than 75,000 installations in 80 countries, and a global network of over 140 partners, Redline's experience and expertise helps service providers, enterprises and government organizations roll out wireless broadband networks to support advanced communications.
